

## 16<sup>th</sup> Annual Meeting of the French Club of Glial Cells

Club des Cellules Gliales

### "Physiology and Pathology of neuro-glial interactions"

Tuesday May 22, 2007  
Montpellier, France

14h00: Introduction and Welcome

Chairman: Stéphane Oliet

14h05 - 14h35: **Frank W. Pfrieder** (Institut des Neurosciences Cellulaires et Intégratives, Strasbourg): "Influence of glial cells on synapse development - an update"

14h35 - 15h05: **Alfonso Araque** (Instituto Cajal, Madrid, Spain): "Astrocytes process and regulate synaptic information"

15h05 - 15h35: **Nathalie Rouach** (Inserm U840, Collège de France, Paris): "Activity-dependent glucose trafficking through gap junctions at the gliovascular interface".

15h35 - 16h35: Poster session and Coffee break

Chairman: Alfonso Araque

16h35 - 17h05: **Maria Cecilia Angulo** (Inserm U603, Laboratoire de Neurophysiologie et Nouvelles Microscopies, CNRS FRE 2500, Paris): "Ionotropic receptors and neuron-glia interactions"

17h05 - 17h35: **Stéphane H.R. Oliet** (Inserm U862, Institut François Magendie, Bordeaux): "Contribution of astrocytes to synaptic transmission and plasticity in the rat hypothalamus".

17h35 - 18h05: **Carlos Matute** (Departamento de Neurociencias, Leioa, Spain): "How glutamate can kill oligodendrocytes"

18h05 - 18h10: Concluding remarks
