

Young Researchers of CCG present

2nd Young Glial Cell Day

13 May 2025 – Montpellier, France

The event in brief

You are a Young Researcher working on Glial Cells?

This event is made for you! Come present your work through a talk or poster presentation!

Of course, Senior Researchers are more than welcome to join us and engage in fruitful interactions with students!

Plenary Speaker

Dr. Marianna BUGIANI
(MD, PhD)

Amsterdam University Medical Center,
Amsterdam, the Netherlands

“Proteomics to investigate glial physiology, pathology and selective vulnerability: the example of vanishing white matter”

Scientific Program

3 symposia

*Shaping Glial Research:
Models and Methods*

*Crossing Borders:
Glial Roles at the Brain’s Frontier*

*Glial Architects:
From Development to Disease*

2 poster sessions

1 Mentoring Session

Localization

« Institut Agro »
2 Place Pierre Viala
Campus La Gaillarde
34000 Montpellier

Social Event

LE SOCIAL BAR & CO « Le Social Bar »
48 Square de la Babote, 34000
Montpellier

Registration until May 2nd

Young Researchers of CCG present

2nd Young Glial Cell Day

13 May 2025 – Montpellier, France

Program

10:00-10:20 Reception

10:20-10:30 Opening Ceremony

10:30-11:30 Symposium 1 - Shaping Glial Research: Models and Methods

Chairs: Mary-Amélie MASSON & XXX

Lolie GARCIA (LMN, Paris, FRANCE)

Astrocytes and microglia in the brain of mouse lemur primate: histology-based characterization in young and old animals.

Sarah MOUNTADEM (Neurocentre Magendie, Bordeaux, FRANCE)

Astrocytes: the unforgettable partners of memory.

Joey ABOU CHAAYA (IGF, Montpellier FRANCE)

Revealing the heterogeneity of the human spinal cord central canal: a novel approach for oligodendrocyte production through exploring new sub-population in the niche.

11:30-11:40 Sponsor Presentation

Christophe LATRILLE - QuantaCell

Title to determine

11:40-12:25 Coffee break + Poster session 1

12:25-13:25 Symposium 2 - Crossing Borders: Glial Roles at the Brain's Frontier

Chairs: Lisaydi DOMINGUEZ-CORONADO & XXX

Noémie DEPRET (CIRB, Collège de France, Paris, FRANCE)

Morphological characterization of the cortical gliovascular interface in health and disease.

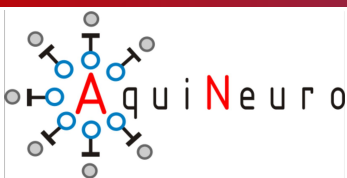

Nicolas OLIVIÉ (CIRB, Collège de France, Paris, FRANCE)

Early microglia in blood-brain barrier genesis and integrity.

Rafik DALI (Faculty of Biology and Medicine, Lausanne, SUISSE)

Synaptic pruning by tanycytes contributes to the maturation of hypothalamic circuits controlling food intake and energy expenditure.

Young Researchers of CCG present

2nd Young Glial Cell Day

13 May 2025 – Montpellier, France

Program

13:25-15:00 Lunch break + “Free” Poster session

15:00-16:00 Plenary Lecture

Chairs: Chloé DIAS & Katia ALILECHE

Dr. Marianna BUGIANI

Proteomics to investigate glial physiology, pathology and selective vulnerability: the example of vanishing white matter

16:00-17:00 Symposium 3 - Glial Architects: From Development to Disease

Chairs: Gaëlle DUDON & Hélène HIRBEC

Clémence DEBACQ (MCD/CBI, Toulouse, FRANCE)

Diving into Astrocyte Diversity: the Functional Enigma of the Olig2 subtype.

Antonija HANZEK (IGF, Montpellier, FRANCE)

Deciphering glial cell phenotypes and heterogeneity upon treatment with IDH1-mutant inhibitor in low-grade glioma.

Noémie CRESTO (IGF, Montpellier, FRANCE)

Astrocytes dysfunction contributes to Intellectual Disability.

17:00-17:45 Coffee break + Poster session 2

17:45-18:45 Mentoring - Science Careers Unlocked: Tips from Those Who Made It

Chairs: Mary-Amélie MASSON & XXX

Dr. Elena AVIGNONE (Neurocentre Magendie, Bordeaux, FRANCE)

Senior Teacher / Researcher

Dr. Alexandre CHARLET (INCI, Strasbourg, FRANCE)

Research Director

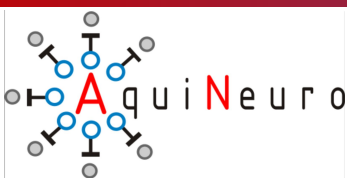

Dr. Iria GONZALEZ-DOPEO REYES (IGMM, Montpellier, FRANCE)

Research Engineer

18:45-19:00 Closing ceremony

19:00-19:30 General assembly
